Assignment 4

Aryan Saraiya

November 11, 2026

1 List

Following are some technologies that can be used to format content:

- LaTeX
- HTML (+CSS)
- Markdown

You would most likely use LaTeX in the following scenarios:

1. To write research papers
2. To embed math equations within other software (e.g. GDocs, HTML etc.)
3. To create your CV, project reports & presentations

There are three main categories of electronic markup:

Presentational Used by traditional word-processing systems: binary codes embedded within document text that produce the WYSIWYG ("what you see is what you get") effect. e.g. Microsoft Word

Porcedural Markup is embedded in text which provides instructions for programs to process the text. e.g. TeX

Descriptive Markup is specifically used to label parts of the document for what they are, rather than how they should be processed. e.g. LaTeX, HTML5

2 Tables & Colors

Code for Table 1 is written in this subsection. However, it will be rendered on a special page. Change the optional arguments such that the table is drawn at the top or bottom of a page or within this section. The last row of this table shows the width of each column.

Read more about how colors are represented as numbers. Try to find out about the HTML notation (both hexadecimal and numeric). Define a custom color with 200 red, 20 green and 200 blue. Define another custom color using colorlet with 60% red, and 40% yellow. Now use these colors to write the following equation:

$$T(n) = aT(n/b) + f(n)$$

3 Figures

3.1 Pictures: rotation & cropping

Include the MNIT logo and rotate it appropriately. Also include the MNIT building picture but crop the sky and make it is as wide as the text, as shown in Figure 2.

Figure 1: MNIT logo

Figure 2: This is a floating image and can appear anywhere.

3.2 Multiple images

Figure 3: This is the first minipage

Figure 4: This is the second minipage

Language	Requires compilation	Output	Use
C/C++	Yes	Executable	To make apps
LaTeX	Yes	PDF	To make documents
HTML/CSS/JS	No	Webpage	To make websites
2.5 cm	2 cm	2 cm	3.5 cm

Table 1: This table should be rendered on a special page.
